

## SURVEY

Because the financial costs of electronic research tools keep escalating and some are being supported by the North Dakota INBRE and Neuroscience COBRE grants, we need to learn how you are using these resources. Your responses will help us justify continuing or finding support for these resources. SCOPUS and Current Contents are both resources that have broader subject coverage than PubMed. SCOPUS provides citation analyses and references used in articles in addition to abstracts. If you use SCOPUS and/or Current Contents, please e-mail \*brief\* replies to these questions to: Judy Rieke, Collection Management Librarian at [jrieke@medicine.nodak.edu](mailto:jrieke@medicine.nodak.edu) Thank you for your participation.

**Deadline: March 9, 5:00 pm.**

1. In what ways do you (or your students) use this resource as a research tool?
  - a. SCOPUS
  - b. Current Contents
  
2. If this resource is discontinued, what would be the impact on your ability to write manuscripts? Grant proposals?
  - a. SCOPUS
  - b. Current Contents
  
3. Which resource is more valuable to you?
  - a. SCOPUS
  - b. Current Contents
